

ASSESSMENT 2 BRIEF

MODULE CODE	COM7016
MODULE TITLE	MSc Project
MODULE LEADER	Nick Mitchell
ASSESSMENT TITLE	Project Artefact
WEIGHTING	40%

ASSESSMENT LEARNING OUTCOMES

Upon successful completion of this assessment, you will be able to:

1. Select, apply and justify appropriate techniques to solve a complex problem that meets a combination of societal, user, business and customer needs as appropriate.
2. Contextualise project work, aligning it with academic literature or with other solutions, as well as with relevant professional codes of practice, research ethics and integrity.
3. Produce a practical, substantial, complex piece of work within a specified timescale based on an agreed specification using project management techniques.
4. Communicate the process and product/findings of the work in an appropriate format, articulating the legal, social, ethical and professional issues surrounding an extended project.
5. Reflect on and evaluate the value of the work achieved and critically reflect on it.

INSTRUCTIONS

You are required to submit the technical product you have developed in response to the project objectives which have been negotiated between you and your academic supervisor. This might take the form of, for example, a software package, or a data analysis pipeline demonstrating applied Data Science / AI skills.

The artefact should be sufficiently technical and complex to satisfy the learning requirements for Level 7. Your project supervisor(s) will offer guidance here to ensure your project has a realistic scope.

As well as the artefact itself, you must also produce a video demonstrating the artefact in use. The video should include a commentary (either voice-over or captions) and must be no longer than 10 minutes.

SUBMISSION DETAILS

RELEASE DATE	21 st April 2026
SUBMISSION DATE	4 th September 2026
DELIVERABLES	A zipped file that includes your code, data, images and any instructions required to run/interact with your artefact. A video recording demonstrating your artefact in use.
SUBMISSION DETAILS	Submit your assignment by uploading it to Moodle <u>before midday</u> on the submission date. This deadline will be automatically and strictly enforced. If your submission is late, your grade may be affected. If you have any issues submitting your work, you must email the assessment team and copy in the module leader <u>before the assessment due time</u> . Do not leave your submission until the last minute to avoid any penalties due to problems with the submission portal. Assessment Team: assessment@leedstrinity.ac.uk Module Leader: n.mitchell@leedstrinity.ac.uk

We may ask for a demonstration of your work following the submission. If needed, this will be communicated to you individually via email. Please check your emails regularly.

Your feedback / feed forward and mark for this assessment will be provided within 15 working days.

MARKING CRITERIA

Marks are awarded based on the following criteria. Within each part, aim to complete the work for each section before moving on to the next. The following banded marking scheme is used:

<i>Exceptional</i>	100/95/92		<i>Pass</i>	58/55/52
<i>Distinction</i>	88/85/82		<i>Bare Fail</i>	48/45/42
<i>Distinction</i>	78/75/72		<i>Fail</i>	38/35/32
<i>Merit</i>	68/65/62			

If you have completed all the preparatory exercises and attended your classes, the estimated additional time required to PASS this assessment is approximately 200 hours.

Please note that threshold marking applies to this assessment. If you do not meet the criteria within a marking category, your overall mark will be capped at the maximum for the preceding category, and you will not be eligible to achieve marks in higher categories. To ensure a pass, you must complete all tasks specified in the PASS Mark (50%) criteria. Only once these requirements have been fully satisfied should you focus on meeting the criteria for higher mark bands.

To obtain a PASS mark (50%), you must have:	- Produced a basic functioning artefact, which may be incomplete. - Constructed the artefact using standard tools or approaches, with minimal adaptation. - Made a limited attempt at validation or robustness. - An artefact that meets the minimum expectations of relevance insofar as it supports answering the research question. - A user interface (where applicable) that is basic or undeveloped.
To obtain a MERIT mark (60%), you must have (in addition to the above):	- Produced a functional artefact that uses appropriate methods or libraries effectively. - Demonstrated a clear understanding of key principles as appropriate to the nature of the artefact. - Code which is readable and documented to a certain extent. - Evidence of testing/evaluation having been carried out. - A clear link between the artefact and the research question / project objectives.
To obtain a DISTINCTION mark (70%), you must have (in addition to the above):	- Produced a highly functional and well-structured artefact. - Created a modular, readable and well-documented code-base. - Used algorithms, models or data pipelines correctly, as appropriate to the nature of the project. - Shown a good level of technical autonomy and problem solving. - Built an artefact which has the potential for re-use or further development.
To obtain an EXCEPTIONAL DISTINCTION mark (80%), you must have (in addition to the above):	- Produced an outstanding, robust, solution featuring high quality design and usability. - Integrated advanced models, data engineering or AI techniques. - Demonstrated creativity and/or innovation. - Produced an artefact with potential for deployment or publication.

addition to the above):

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE IN THIS MODULE

You may use generative AI such as Microsoft Copilot to assist you in the process of undertaking the assessment in the following ways: brainstorming, research, planning, feedback, editing.

All use of generative AI must be explicitly acknowledged, and any artificially generated content (e.g. images) explicitly labelled, with the source of the AI tool referenced using current APA referencing conventions. You can find further guidance on the library website on their AI webpage).

In submitting your assignment, you agree to disclose the extent to which you have used generative AI in preparing this work and include evidence of your AI use in your appendices (e.g. dated screen shots of your use of this tool or copy and paste your AI chat into Word).

Failure to disclose your generative AI use may result in a zero for your assignment and a referral for academic misconduct (see the Student Academic Misconduct Policy under Essential Info in the MyLTU app).

Include one of the following statements on your assignments.

Either:

This assignment used generative AI in the following ways for the purposes of completing the assignment (choose 1 to 5 of the following): brainstorming, research, planning, feedback, editing.

Or:

This assignment did not use generative AI for the purposes of completing the assignment.

ACADEMIC MISCONDUCT

Academic Misconduct includes all forms of academic dishonesty, whether intentional or accidental, that compromise the integrity of the University's assessment processes. It is essential that you review our [Student Academic Misconduct Policy](#) to understand the guidelines and the serious consequences that may arise if they are not followed.

HELP AND SUPPORT

- Please use the module handbook and the [Computer Science Community Teams site](#) as a source of information. Do try and find the answer out yourself before reaching out for help.
- Support will be provided via Microsoft Teams and email during office working hours. You can also ask questions during your timetabled sessions. You may request a one-to-one meeting with a tutor during their published office hours.
- The Student Support team are available seven days a week to support you in all aspects of student life. This could be for support relating to your course, your accommodation or for more general advice such as relationships or your wellbeing. Log in to the LTU app to access support services.
- The full set of university guidelines on assessments, deadlines, and extensions is available on the LTU app, please familiarise yourself with the documentation.
